

Proposed Designs made for the **General Information Technology** **Revision Guide**

Client: Ms. Ellen Watson

Client Occupation: Event Coordinator of
GIT seminars of College

Date: 27th August 2018

There are two proposed designs for the eBook are shown below. They are first and second proposals which were made to attract the student's attention by matching the theme of this multimedia product. All of these designs are proposals used to make the final product's outcomes and appearance. Therby several changes made during process of creating the actual multimedia product.

1st Proposal made in the white background to make the product colourful. There are many multimedia images in the coverpage to attract the student's attention. The heading and sub heading styles were also used to match the theme of the design. This proposal has a slight informat touch because it made to match the target audience's structure.

The proposal is made in low color background and it has a formal layout and style because it made to look more work- purposed and educational. Therefor this design has a presentation styele structure which make it easy to use.

COVER PAGE DESIGNS OF THE PROPOSALS

Cover Page design of 1st Proposal

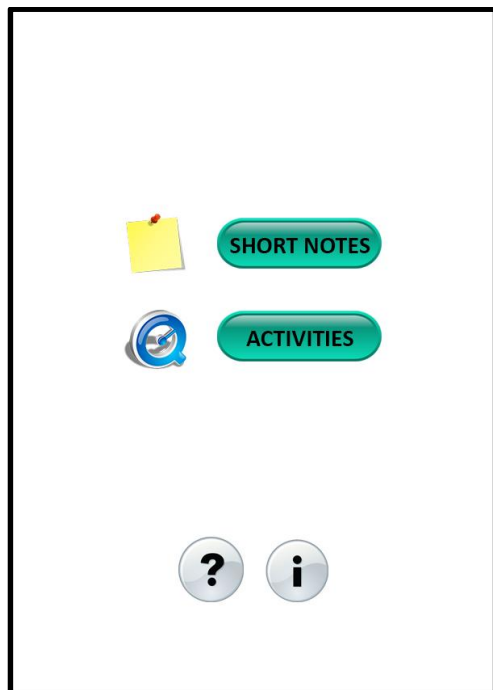

Cover Page Design of the 2nd Proposal

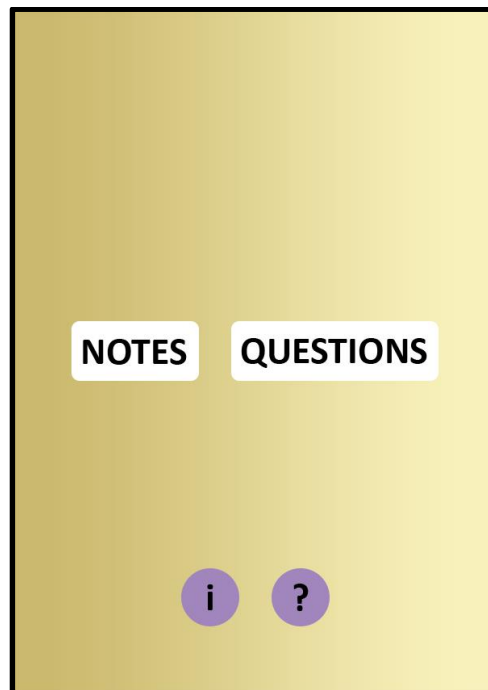

Both above designs are coverpages of the 1st and 2nd proposals. As I mentioned above 1st design has a colourful look because it consisted with decorative images, pictures and a button. The second proposal has normal text and normal picture along with a normal entrance arrow.

HOME PAGE DESIGNS

Home page of the 1st proposal

Home Page of the 2nd Proposal

The buttons with small images used in the 1st design proposal make the ebook more attractive and also make colourful. Therefore 1st design has user friendly look.

The buttons in the 2nd proposal are looks normal because they are like computer buttons. Therefore 2nd design has a formal design layout.
